Green Public Procurement

- Instrument for many policies
 - Environmental
 - Economical
 - Innovation...

Directive 2006/32/EC

PPAA have to apply energy efficiency criteria in public procurement (vehicles, IT, buildings, energy services)

To obtain a 1,5% reduction in energy consumption by year until 2015

Green Public Procurement

- Promotion of greener products and services (market driver)

How that is defined?

- Life Cycle Thinking
 - Regulations
 - Ecolabels
 - Footprints...

Green Public Procurement

- Legal limitations of Public Procurement
 - EU procurement Directives
 - National legislation
 - EU Treaty principles
 - WTO Agreements

Limits what tools and
criteria to use in GPP

What has to be guaranteed?

- Link to the subject matter
- Transparency (clear and verifiable criteria)
- Proportionality
- No discrimination
- Freedom of movement of goods and services

Procurement
function

What do procurers use more?

Legislation & Type I Ecolabels

- Environmental improvement
- Clear and precise criteria
- Pass/fail most of the time
- Easy to verify
- Easily linked to national environmental priorities

Why do procurers use less... LCA?

Self "limitations":

- Not all impacts included
- Product not environmentally better

Procurement limitations:

- Not unified methodology
- Link to the specific product/service
- Discriminatory to SMEs
- Linked to Global Warming impacts

Why do procurers use less... CF?

Self “limitations”:

- Reductionist
- Deviate focus from energy consumption and other relevant impacts

Procurement limitations:

- Transport emissions
- Production emissions
- Where to use CF

Where to progress in their use?

- Prioritisation of product groups
- Prioritisation of environmental criteria
- Use in design projects (buildings, infrastructures)
 - Previously to define object
 - Need to define scope, LCI data, assumptions, etc.
- Continue improving LCA databases and methodologies
- Define environmental declarations and LCA with alternatives to be used in GPP
