Main results/conclusions

Seek synergies of different approaches (to LCA/footprinting)
 harmonize system boundaries & allocation modes
 Understand & utilise pareto-principle
 conflicts with public procurement ("freedom of trade")
 PCR not too narrow!

Proposal for further activities

make sure, footprints/LCA results are

- * understandable for consumers/decision makers
- * scientifically sound
- * useful for policies/governance (e.g. tax basis)
- * affordable for business-community
- * transparent and accessible

seek synergies between current approaches
