 (e-mail: neslihandogansaglamtimur@gmail.com)

Main results/conclusions

- Importance of the quality of lighting & of products
- Start from the user side - not just technology pushed
- medical importance was not known by most participants
- importance of being aware of the visual, biological & emotional aspects
- being aware/having a critical stance when looking at and using the new technology

Proposal for further activities

- Publication on lighting f. sustainable development from different perspectives
- Organise more processes to bring ~~acad~~ researchers, business people & public actors together
